CYCLES AND DSGE MODELS ... We know that equilibrium outcome (income) of the economy occurs at the point where the demand for goods and services is equal to supply. Hence, the change in equilibrium occurs either as a result of a change in the aggregate demand (Keynesian view), or a change in Feb 7th, 2024.

Thus in large samples the Gibbs sampler and the normal theory ML-approximation Feb 6th, 2024
