**Solutions - ETH Zürich - Homepage | ETH Zürich**

3. A signal  $w[n]$  is generated by drawing independent samples from a Gaussian distribution with zero mean and variance 4. Calculate the expected power of  $w[n]$  in the frequency band  $[0; \omega = 2]$ . (2 Pt)

4. The magnitude response  $|H(\omega)|$  of a continuous-time LTI system is defined as follows:  $|H(\omega)| = 1$  for  $0 \leq \omega \leq 2$ .
