4.6 Null Space, Column Space, Row Space
It should be clear to the reader that if A is invertible then $\text{Null } A = \{0\}$. Indeed, if A is invertible, then $Ax = 0$ only has the trivial solution. We state it as a theorem.

Theorem 3.5.2 If A is invertible then $\text{Null } A = \{0\}$.
In earlier chapters, we developed the techniques for finding the null space, range, row space, and column space of a matrix. For a matrix A , the row space is the span of the rows of A . Use the row space method, or transpose and use the column space method. The column space is the span of the columns of A . Use the column space method, or transpose and use the row space method.
Rank: For these pictures, I used the matrix $A = \begin{bmatrix} 1 & 2 & 6 & 2 & 4 & 12 \end{bmatrix}$. The null space is 2-dimensional.
