Formula, it is considered a molecule, but it also has 2 different types of atoms (elements) in the formula so it is also considered a compound. Atoms, molecules, elements and compounds are formed when elements are mixed and react so that the atoms join together. Naming compounds: if there is a metal in the compound, the name of the metal goes first. If the compound contains only two elements then one of the element's name has its prefix. 13-3 Molecules and Carbon Compounds. Explain why life is often referred to as "carbon based".
